- Snow: Arctic Falls Plantskolan (S)
- Rolling noise: ATP Papenburg (D)
- WGI ECE R117 Annex 5 & 9: Neubiberg (D)
- Rolling resistance & highspeed test advanced: TÜV SÜD Product Service Garching (D)

TEST VEHICLES

- VW Passat 1.5eTSI & 2.0TDI, Audi A5 2.0TDI

PROCEDURE & EVALUATION

- In most tests, the reference/control tire is tested repeatedly in the progress of the test to detect and consider changes of the ambient test parameters and correct its performance by linear interpolation.
- Generally, all tires in a test are primarily evaluated in relation to the reference/control tire.
- The performance is expressed as a percentage value, calculated on the basis of the measured and corrected test data.
- In this present evaluation, the performance of each tire is assessed relative to SAILUN ICE BLAZER Alpine EVO² ($\triangleq$ 100%).
- In all evaluations, a percentage >100% means better and <100% means worse.

TEST RESULTS

ACCELERATION ON SNOW

- Acceleration on compressed snow with activated ETC (double execution)
- Result: Ø Acceleration time [s] from 10 to 40 km/h → Mean acceleration [m/s²]

ACCELERATION ON SNOW PERFORMANCE * [%]

*) The calculation of the percentage performance is based on the mean acceleration values resulting from the measured acceleration times.

TÜV SÜD PS – TÜV TIRE TEST MARK 2025

TEST RESULTS

BRAKING ON SNOW

- ABS-braking on compressed snow (double execution)
- Result: Ø Stopping distance [m] from 40 to 5 km/h → Mean deceleration [m/s²]

BRAKING ON SNOW PERFORMANCE * [%]

*) The calculation of the percentage performance is based on the mean deceleration values resulting from the measured braking distances.

TÜV SÜD PS – TÜV TIRE TEST MARK 2025

TEST RESULTS

HANDLING ON SNOW

- Subjective assessment and lap time on a snow handling circuit (track length: 1105 m) (double execution)
- Result: Ø Rating (min. 1, max. 10) and Ø lap time [s] → average speed [km/h]; total result from speed and rating scores (2:1)

HANDLING ON SNOW PERFORMANCE * [%]

*) The calculation of the percentage performance is based on the speed and the rating scores (at the ratio 2:1).

TÜV SÜD PS – TÜV TIRE TEST MARK 2025

TEST RESULTS

AQUAPLANING STRAIGHT-LINE

- Objective measurement of longitudinal aquaplaning performance; water depth ~ 8 mm
- Result: Aquaplaning speed [km/h] at 15% slip

AQUAPLANING PERFORMANCE * [%]

*) The calculation of the percentage performance is based on the measured aquaplaning speeds.
